- Demo Days

Co-Working Pavilion

MIND
MILANO INNOVATION DISTRICT

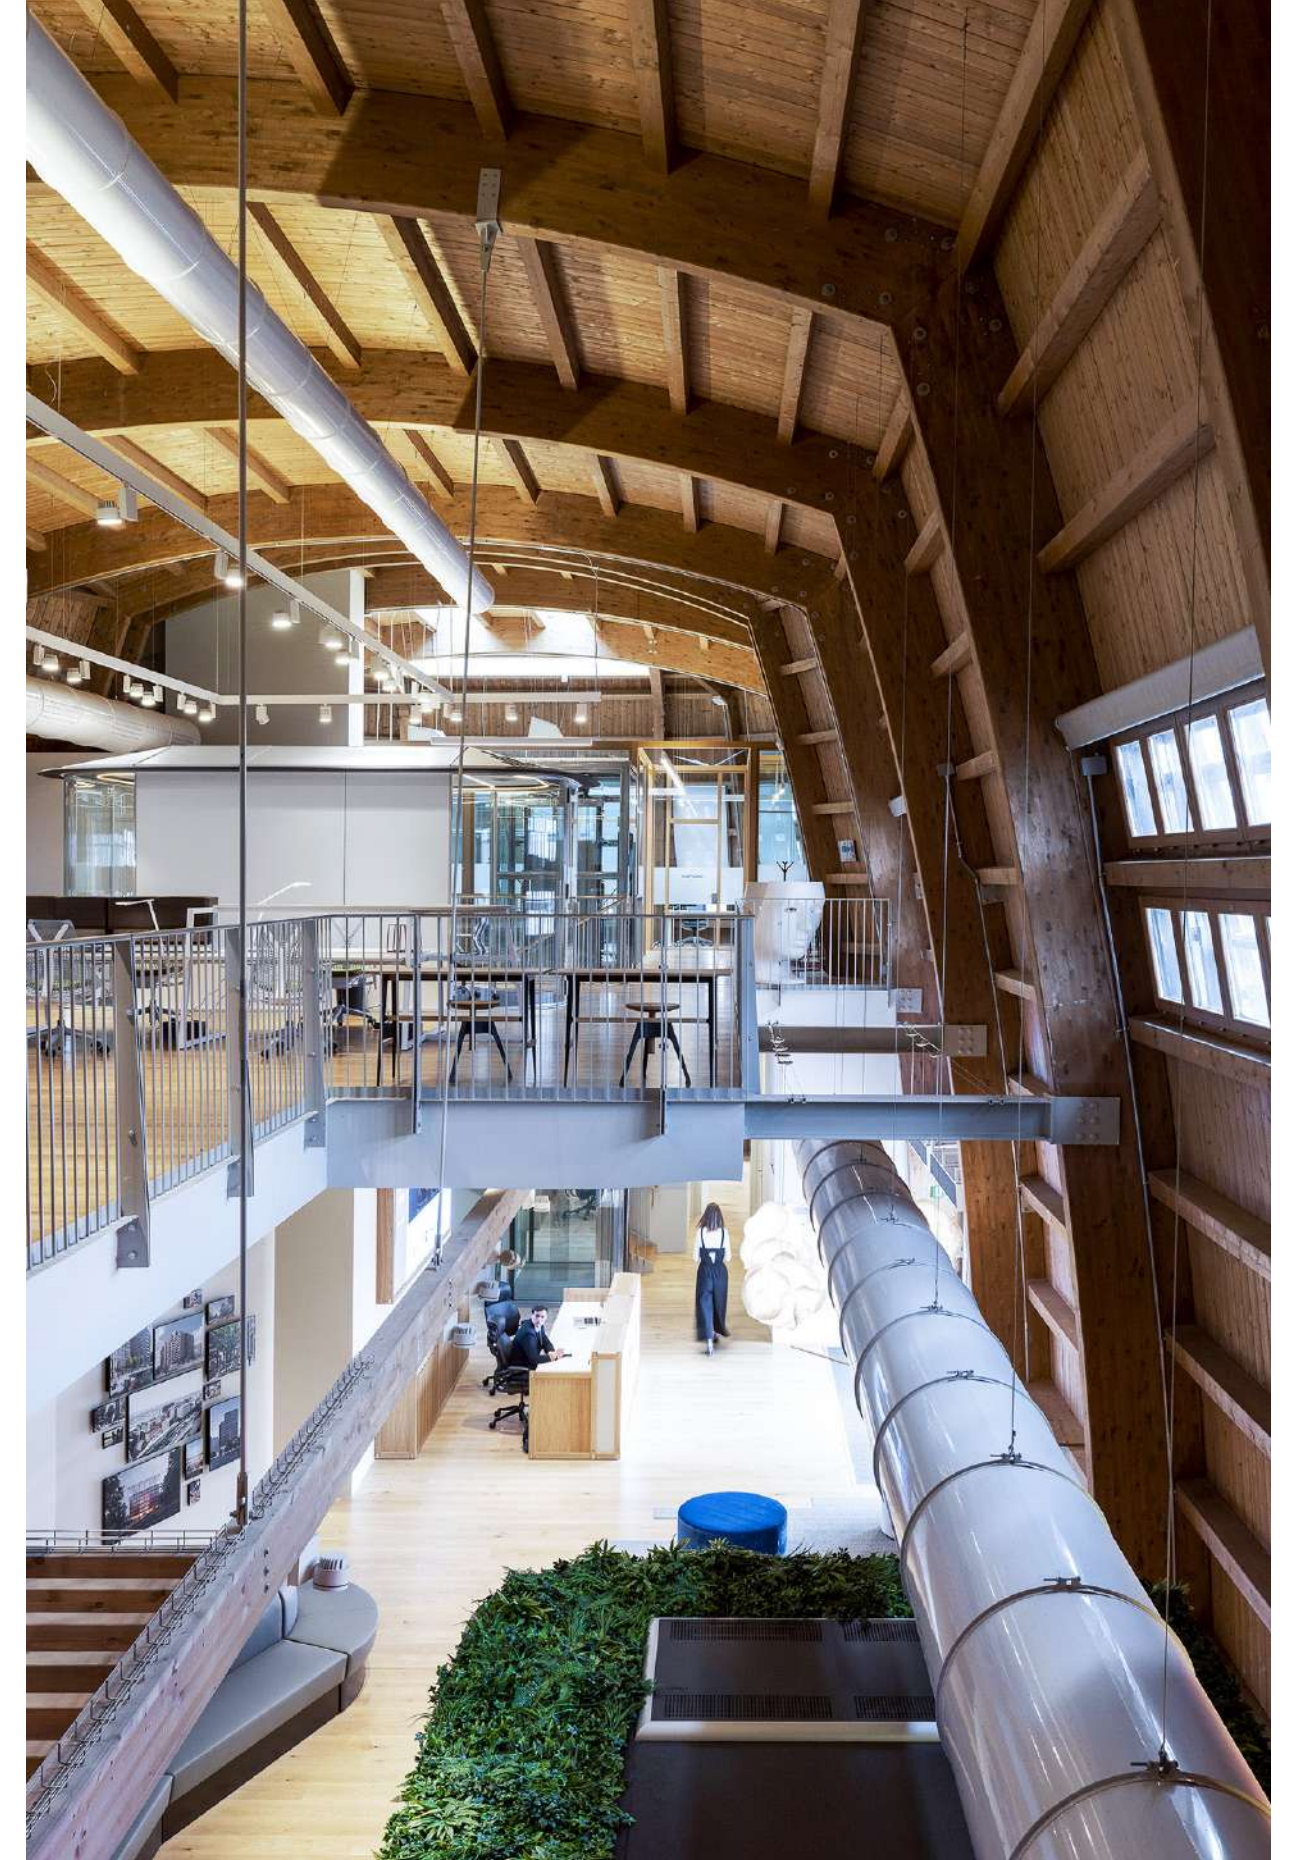

lendlease

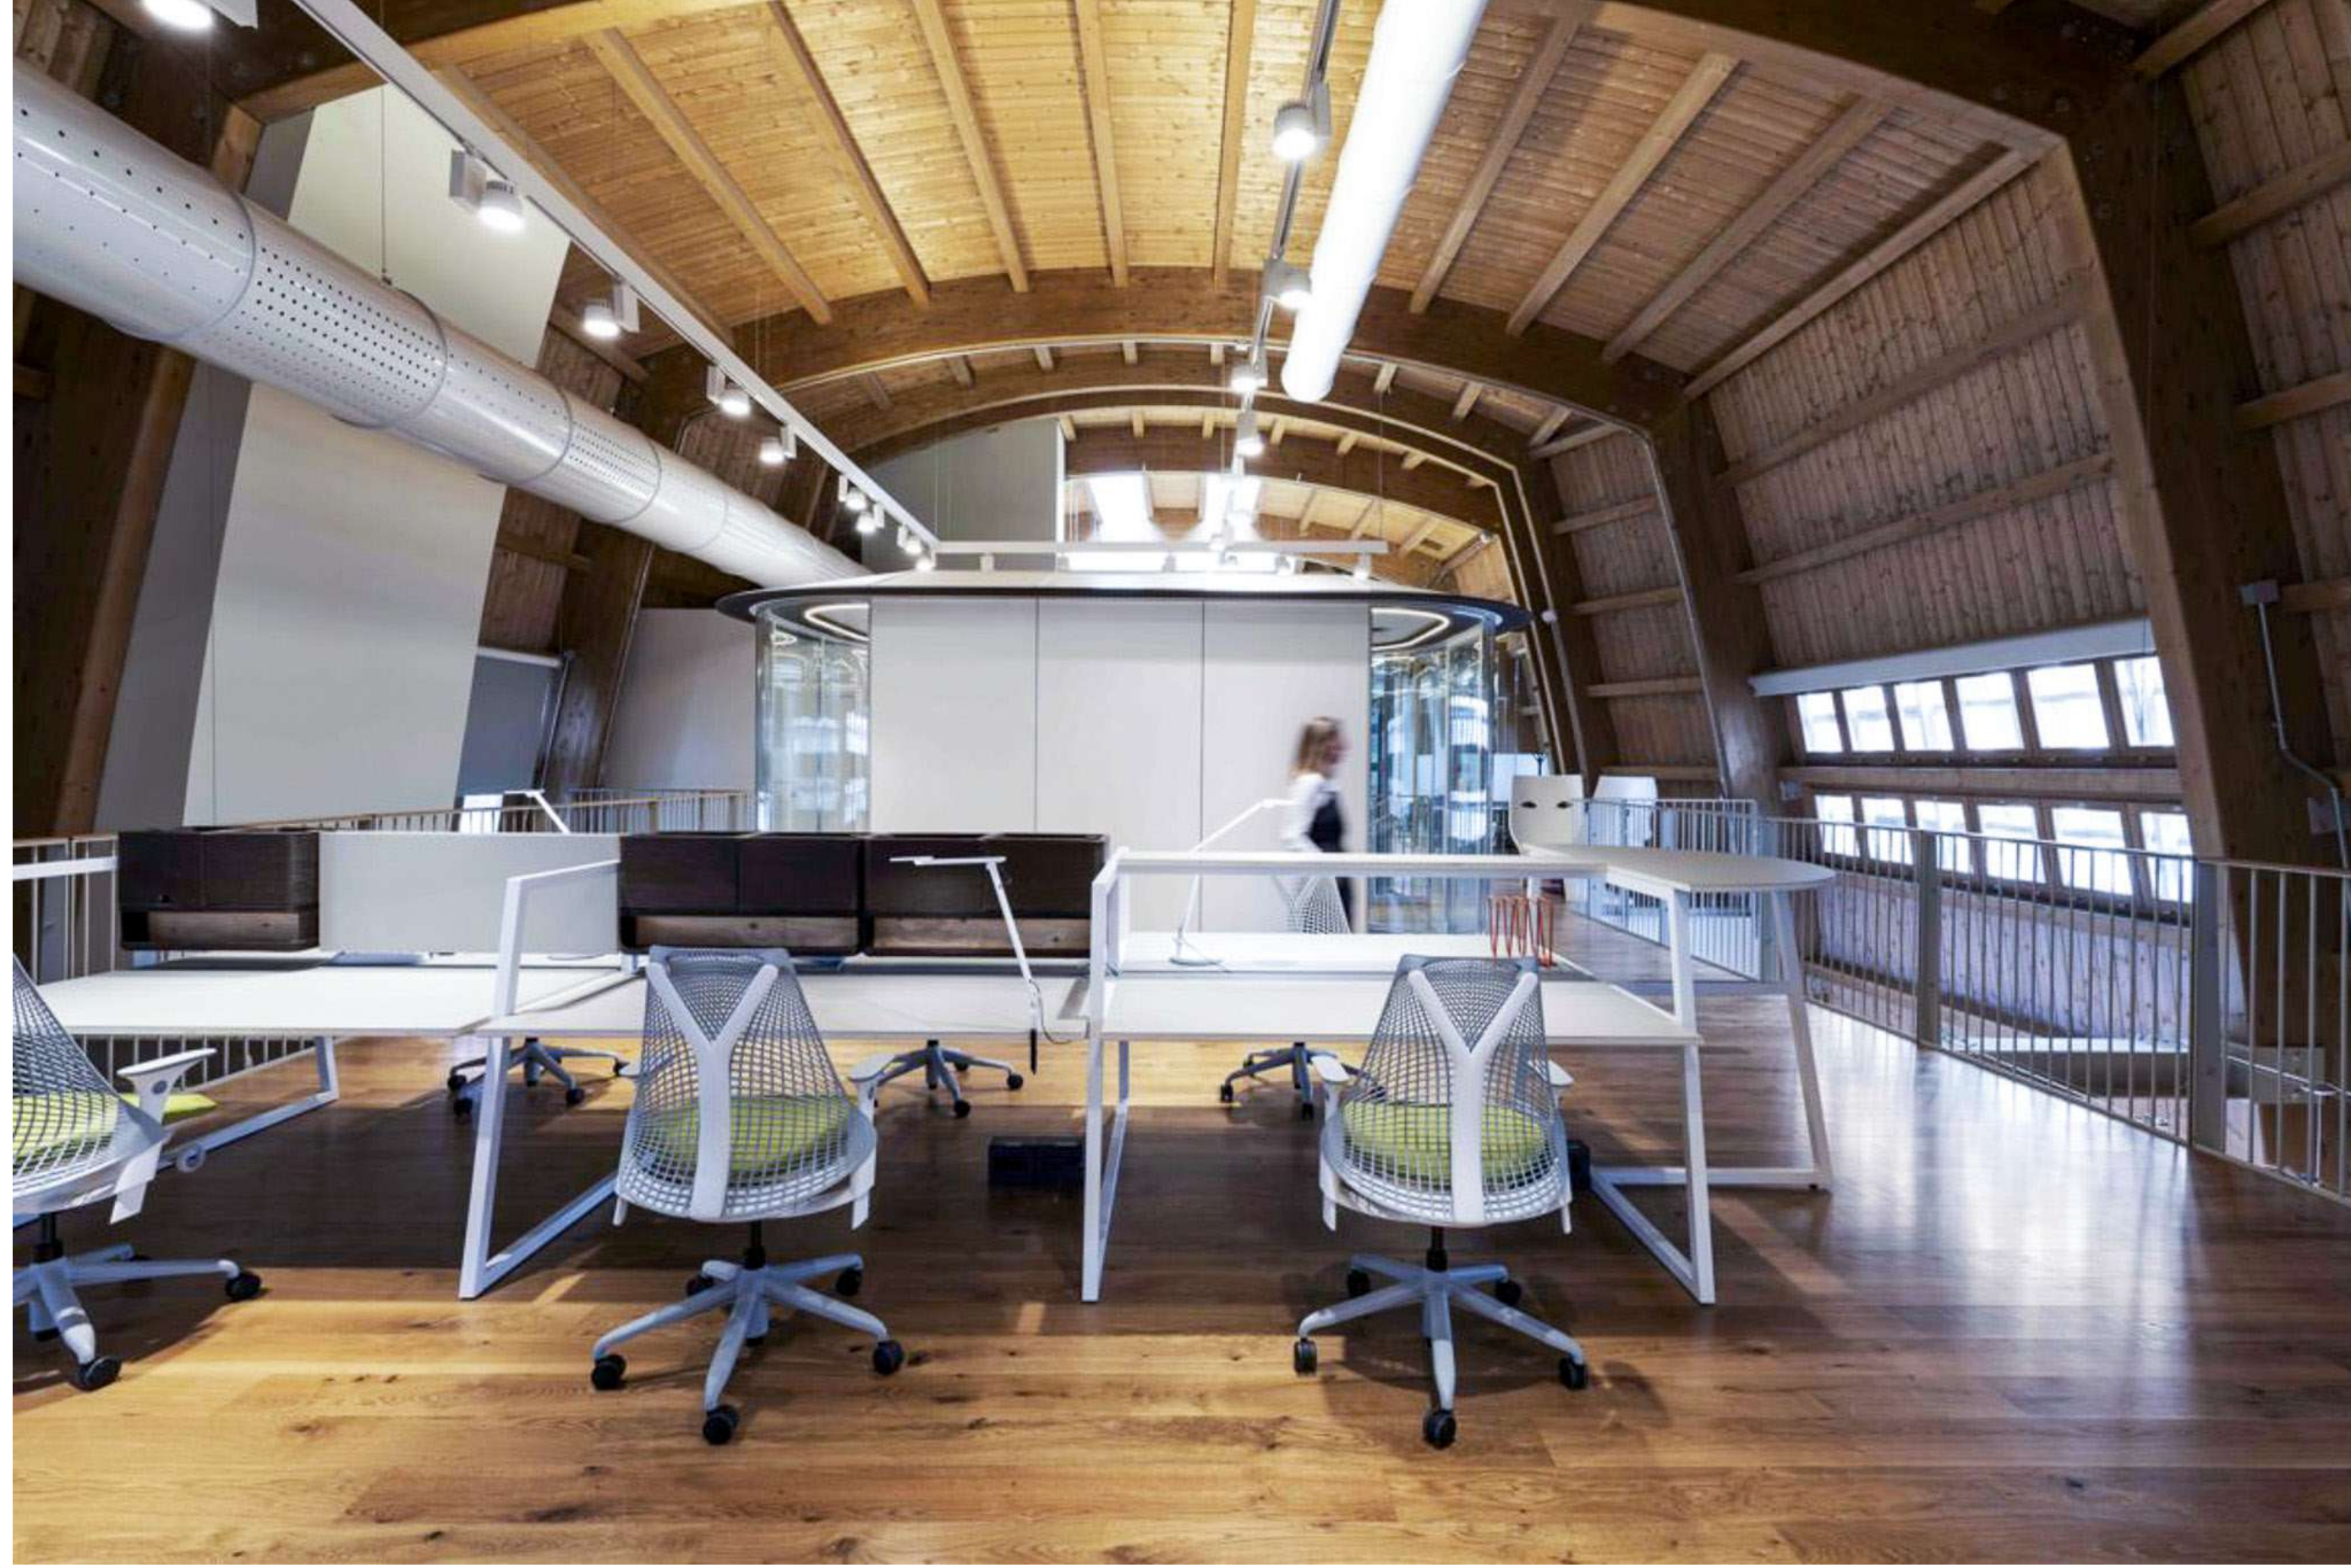

MIND's Village Pavilion, headquarter of Designtech, is the first flagship space within the new Milano Innovation District and aims to represent the workplace of the future serving also as a "Design Living Lab" where constantly test new products and solutions. The fit out of the space is the result of the first innovative procurement process managed by Designtech.

The ground floor is a mixed use space (reception, food lounge, pitch arena) and hosts also MIND's marketing suite. The coworking is located on the upper floor and has six closed offices, a meeting room, two open space work benches and a small area for brainstorming sessions. The space has been conceived to bring together startups, scaleups, innovative SMEs, technology companies, designers, makers and market leading companies under one roof, so that they can connect and collaborate.

Large Format 3D Printing

The first open urban factory dedicated to design industry, with hybrid spaces to support rapid prototyping and digital fabrication activities that will coexist in symbiosis with offices hosting deeptech startups and scaleups, self-produced designers and makers. A one of a kind light industrial innovation center, a catalyst of technological innovation and creativity for the city of Milan and a stimulus for the entire Made in Italy industry.
